

## **A brief summary of the Capacity Building Workshop by STOP:**

A Capacity-Building Workshop to Prevent Human Trafficking was organized in two regions of Uttarakhand on the second and fourth of December, 2022, the summary of which is stated below:

### **Nainital:**

Here, STOP's representatives explained all the legal procedures related to human trafficking. They discussed how the victims are lured by giving false information, either by tempting them with more money, or with a better livelihood, thus taking their consent and throwing them in exploitative situations. The members informed about merging the childline number, which was now directly connected to the DCP's desk.

### **Dehradun:**

Here, STOP's representatives introduced the organization's methods of prevention, and assisting women to become strong, both monetarily and information-wise, so that they can approach the right institution whenever they know that they are in danger. Members also shared their experiences while dealing with different and newer forms of trafficking.

In both the regions, the workshop finished with a short discussion, an exercise related to anti-trafficking legal procedures, and filling feedback forms with ideas for our future endeavours while collaborating with such organizations to eliminate human trafficking.
